1 COMPANY OVERVIEW

Offshore Air Diving

| ROV Inspection

| Marine Support

| Subsea Intervention

Compact & Direct

Management accessibility with fast decision-making and low overheads.

Integrated Delivery

End-to-end service from planning, method development, engineering, execution and final reporting.

Rapid Response

24/7 Emergency response and rapid mobilisation across UK and global locations.

OUR VISION & VALUES

Our vision is to establish Caldive as the offshore industry's trusted air diving support contractor.

Safety

Creating a safe, incident-free workplace wherever we operate for everyone.

Success

We are committed to delivering the outcomes to meet our client needs and can be trusted to achieve consistently high performance and success on every project.

Integrity

We act with integrity and uphold the highest ethical standards treating our employees, workers, clients, people, partners and suppliers fairly and respectfully to build trust and lasting relationships.

Collaboration

We collaborate openly with clients, partners and suppliers to achieve safer, stronger outcomes for everyone. Teamwork.

Environmental

We take responsibility for our social and environmental impact, working proactively to protect the planet and address the challenges of climate change.

Adaptability

We respond quickly to changing conditions and project demands, combining innovation, expertise, technology, assets and partnerships to deliver smarter, simpler solutions – even under pressure.

2 OPERATIONAL CAPABILITIES

RENEWABLES

- Leading nearshore diving contractor with extensive experience in cable duct installation, cable pull-ins and subsea cable protection.
- Deliver complete single-contractor project management including: dredging, diving, mattress installation, ploughing and split-pipe protection.
- Tidal and wave energy track record completing in-situ repairs to tidal turbines, alongside diver-led NDT on tidal test rigs and decommissioning prototype generators.
- Provide inspection, repair & maintenance across fixed and floating offshore wind projects - including bend stiffener recovery/reinstallation, ICCP system and earthing strap maintenance and disconnection of floating prototype structures.

SHIPPING/INSPECTION & INTEGRITY (UWILD/IWS)

- Approved service supplier for in-water surveys of ships and offshore units (using divers and ROVs) for **ABS, Bureau Veritas (BV), DNV, Lloyd's Register, RINA** and **Shell's** approved diving contractor for inshore diving services across its vessels and marine assets.
- In-water survey of fixed and floating offshore assets, pontoons, sea chests and subsea structures.
- Experienced project managers, supervisors and CSWIP **3.1U, 3.2U** and **3.4U** inspection divers.
- Magnetic Particle Inspection (**MPI**), Eddy Current, Phased Array Ultrasonic Testing (**PAUT**), Alternating Current Field Measurement (**ACFM**), Ultrasonics, Plate-Thickness Measurements, and Cathodic Protection (**CP**) Measurements.
- High-definition digital video, still photography, defect logs, and class-endorsed reporting.
- Immediate preliminary findings provided by supervisors before leaving the vessel, followed by full structured documentation.
- Rapid mobilisation to major UK ports and European locations.
- Inspections can be conducted alongside, in port, or offshore at anchorage.
- Servicing FPSOs, offshore support vessels, cruise ships Panamax vessels, and marine assets.

■ Underwater repair & maintenance services including:

- ☐ Cleaning activities including general marine-growth removal, debris clearance and spud-can mud removal.
- ☐ Fouled propeller clearance.
- ☐ Damaged propeller dressing and polishing.
- ☐ Underwater welding and structural repairs.
- ☐ Temporary and permanent plugging/blanking.
- ☐ Transducer and echosounder replacement.

2 OPERATIONAL CAPABILITIES

OIL & GAS

- Long standing track record supporting the oil and gas industry across UK, Scandinavia, Europe, the Mediterranean and South Africa ports and anchorages.
- UWILD inspections, repairs, cleaning, blanking & cofferdam installation, NDT, subsea painting and anode/ICCP replacement.
- Retrowrap services.

SUBSEA CONSTRUCTION, CABLES & RENEWABLES

- Nearshore/offshore cable laying, pulling, burial, tie-ins and protection.
- Installation of concrete mattresses, split-pipe systems and scour protection.
- Marine support for HDD and landfall interfaces.
- Tidal turbine repairs and wind farm subsea interventions.

INTERVENTION REPAIR & MAINTENANCE

- Underwater welding, fabrication and structural repairs.
- Cofferdam and blanking design, installation and removals.
- Anode / ICCP replacement and earthing-strap work.
- Ships hull husbandry: propeller clearance, polishing, sea-chest and valve work.
- Marine growth removal, cleaning and spud-can mud removal.

UTILITIES & NUCLEAR

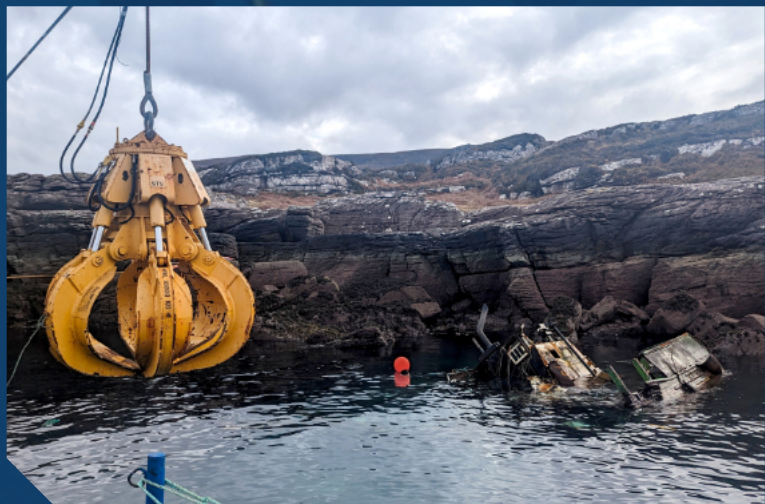

- Specialist diving and ROV services for nuclear, utility and industrial sections (distilleries, factories, treatment works).
- Planned inspection, maintenance and installation of outfalls in highly controlled environments.
- In-house health physics support to manage radiological contamination risks and meet reporting requirements.
- Complete project management, dive-support, dive teams, ROV inspection and rapid mobilisation.

- Delivering planned maintenance and 24/7 emergency response for Scottish Water, minimising disruption to essential services.
- Inspection, repair and maintenance across reservoirs, tanks, pipelines, intakes and outfalls, including confined or restricted-access environments.

SALVAGE, RECOVERY & DECOMMISSIONING

- Salvage & recovery delivering in-situ inspection, damage assessment, practical recovery, underwater repair or refloating for grounded and sunken vessels.
- Providing on-site dismantling, heavy lifting and safe disposal ashore with active environmental protections (Oil booms, silt curtains).
- Trusted contractor for the MCA, insurance underwriters, salvage masters and technical experts.

2 OPERATIONAL CAPABILITIES

CIVIL ENGINEERING

- Commercial diving, subsea engineering and practical marine risk management for civil infrastructure.
- Registered with Achilles FPAL, Builders Profile, Construction Line and Safety Schemes in Procurement (SSIP).
- Seabed survey, harbour maintenance, bridge and scour surveys and condition assessments.
- Underwater welding and fabrication, anode/cathodic protection installation and contaminated water diving.

MINISTRY OF DEFENCE

- Subsea support & ship husbandry having in-depth marine engineering expertise to deliver complete inspection, maintenance and repair.
- Proven capabilities to support the Salvage and Marine Operations (SALMO) team and Tier 1 framework contractors.
- Rapid mobilisation with responsive team capable of fast deployment to UK ports, anchorages and naval facilities.

3 PROJECT MANAGEMENT & ASSURANCE

Managed from Start to Finish

Caldive delivers complete project management from early planning and design support through to safe execution and final reporting. Our specialist team manages personnel, equipment, logistics and inspection requirements, ensuring every project meets client specifications with full compliance, quality and traceability.

Competency & Personnel Assurance

Caldive maintains a structured competency system to ensure all diving and ROV personnel meet industry standards. The process is fully aligned with International Marine Contractors Association (IMCA) guidelines and UK HSE Diving at Work Regulations, our process validates technical qualifications, operational experience and compliance to guarantee high quality execution on every project.

4 OUR ASSETS

Marine Fleet

Renewable Service Vessel,
Dive Support Vessel,
Self-propelled Crane Barge,
Workboats.

Diving Systems

Company-owned containerised and mobile air diving systems with topside HD monitoring, IMCA compliant audited to D023, Recompression Chambers.

ROV

Modern ROV capability for standalone inspection or integrated diver and ROV operations.

5 HSEQ & ASSURANCE

HEALTH & SAFETY

Caldive is committed to ensuring the health and safety of our employees, and others who may be affected by our undertakings including visitors and contractors on our sites and our customers sites by providing a safe place of work and ensuring the prevention of injury and ill health.

Proven in practice and verified by regular audits, Caldive's health and safety policies, procedures, and standards have been proven to meet the IMCA, NORSOK, ADC and HSE ACOPs standards.

ENVIRONMENTAL

Caldive is committed to minimising our environmental footprint across all commercial diving and marine operations. Our environmental management practices are integrated into our operations through a combined Quality, Health, Safety and Environmental (QHSE) Policy, operating in accordance with ISO 14001 standard to ensure continual improvement in our environmental practices.

Operations and Risk Management

In our operational planning the company:

- Considers logistics to reduce our carbon footprint.
- Dedicated to following the reduce, reuse and recycle waste management hierarchy.
- Evaluate and mitigate environmental impacts prior to project execution.
- Equip dive systems with spill containment kits and environmental protocols.
- Adhere to and work with environmental regulations.

Sustainability and Net-Zero Targets

We are committed to reducing our CO2 emissions as part of the Net Zero Nation affiliation, in recognition of the importance to the environmental impact and global effects, and also to align our business with Scotland's 2045 net-zero targets.

QUALITY

Caldive operates an Integrated Management System compliant with ISO 9001, 45001 and 14001 requirements. We maintain a culture of quality, always considering process improvement, risk management and client satisfaction.

By measuring performance and acting on customer feedback, we ensure our services remain at the highest industry standard while continually improving and adapting to client requirements.

7 WHY CALDIVE

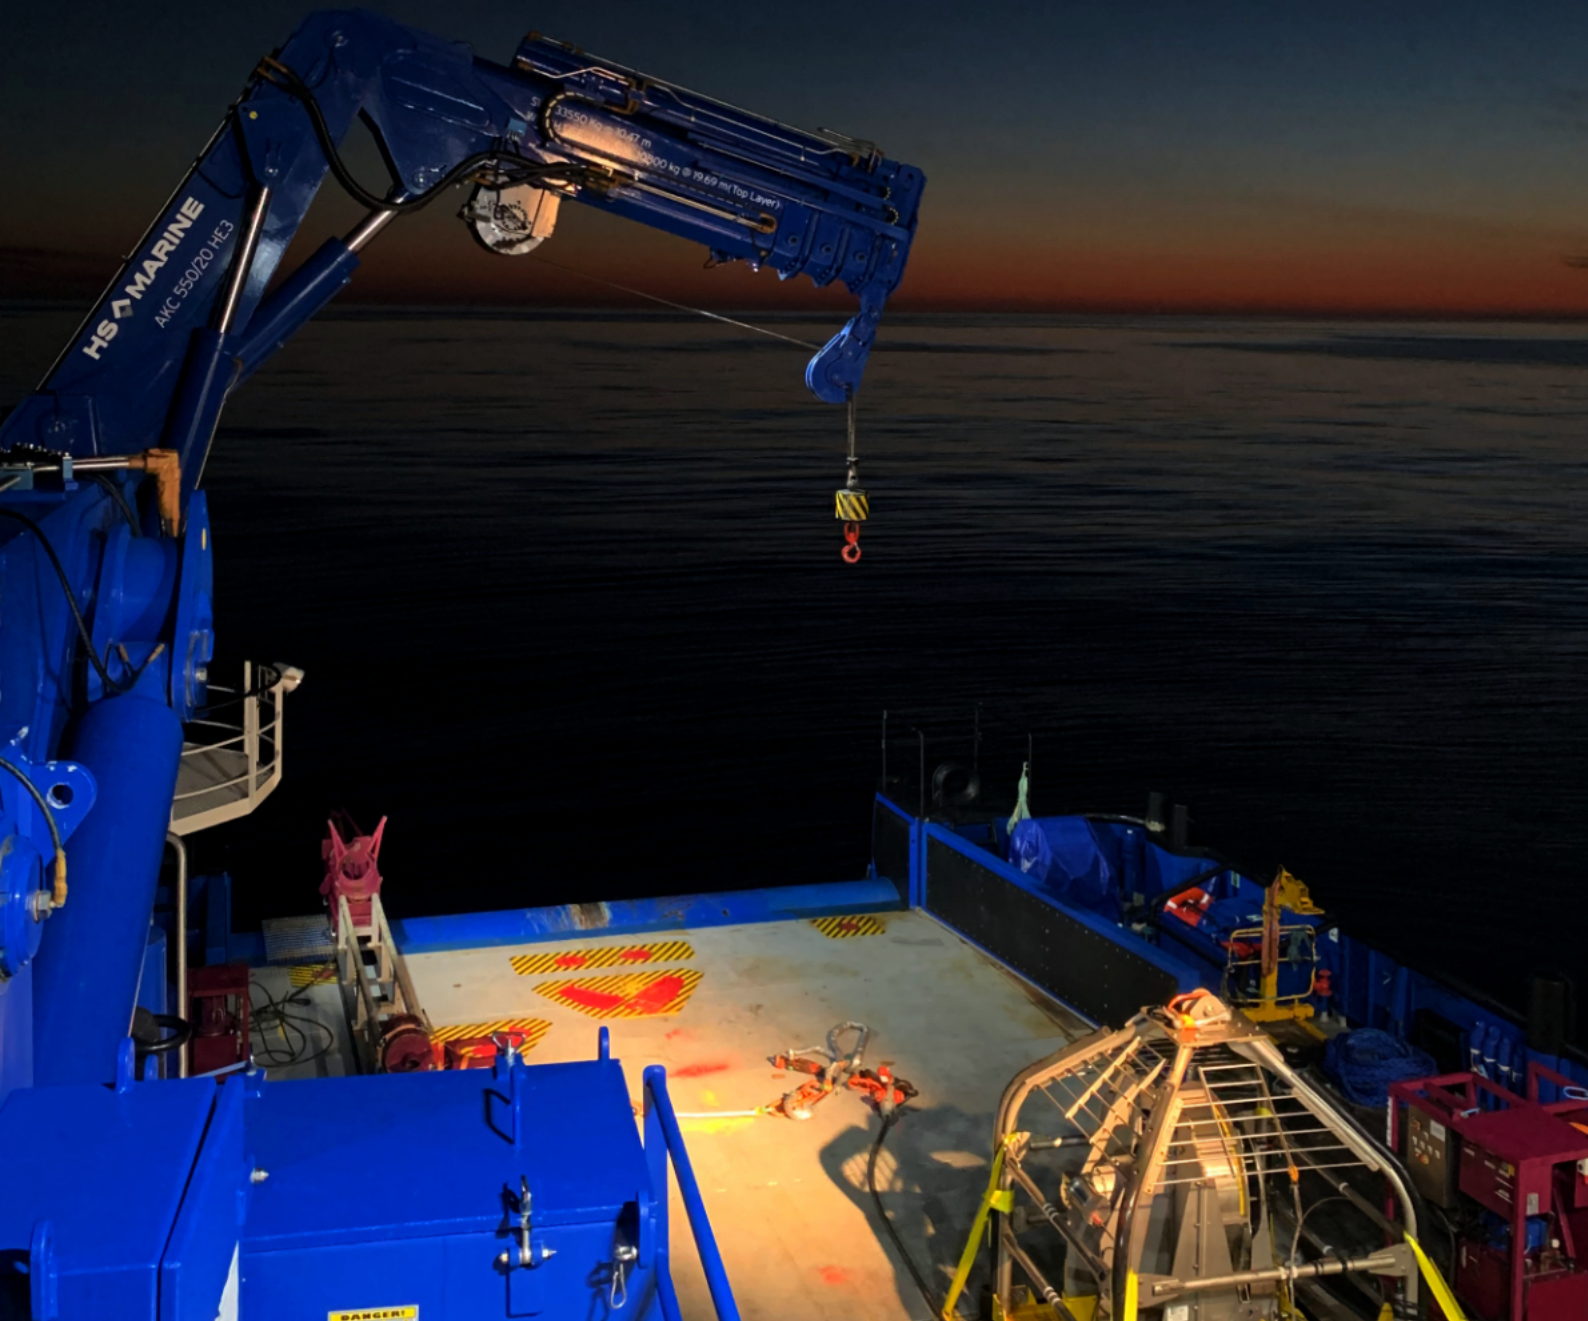

SAFE. PRACTICAL. RESPONSIVE.

EXPERIENCED

- More than four decades of commercial diving knowledge.
- Proven offshore, shipping, renewables and infrastructure work.
- Qualified teams backed by engineering, ROV and marine resources.

COMPACT

- Direct management access and quick decisions.
- Flexible mobilisation and controlled overheads.
- Practical solutions focused on safe delivery and value.
